Suggestions On Exit Strategies For BNB Tiger (cash out and also buy XRP or Another Coin)

These suggestions are for U.S. customers.

We are going to show a few different ways. This diversifies your off-ramps.
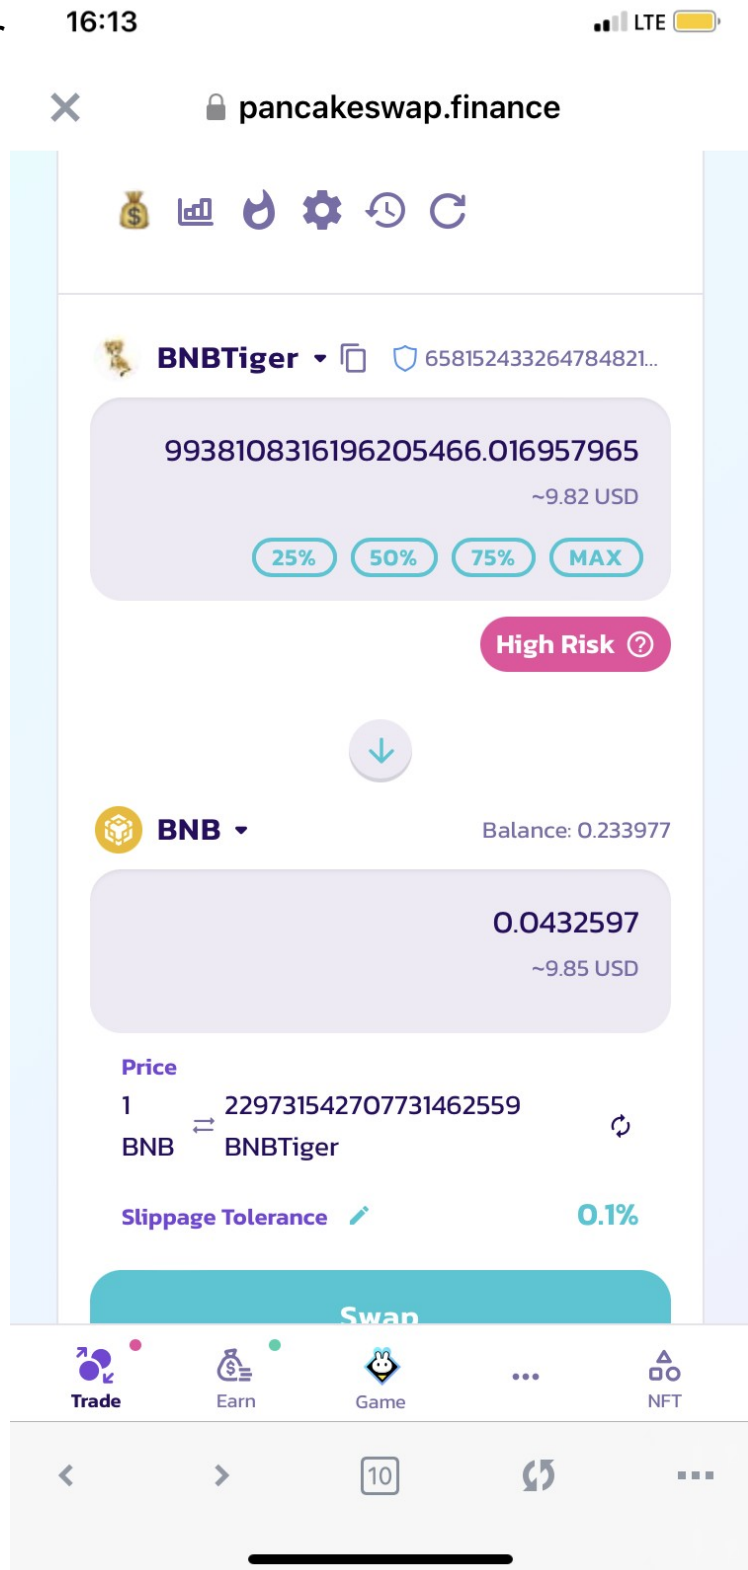

Some of these steps will also apply to Metamask.

Also, some of these steps use Pancakeswap.

First, of course, is to take profit. That typically means swapping BNB Tiger for BNB.

Try either of these suggestions:

BNB Tiger to WBNB (Wrapped BNB) (for slippage) to then BNB

or

BNB Tiger to BNB directly, and make sure the amount of BNB Tiger has decimal digits.
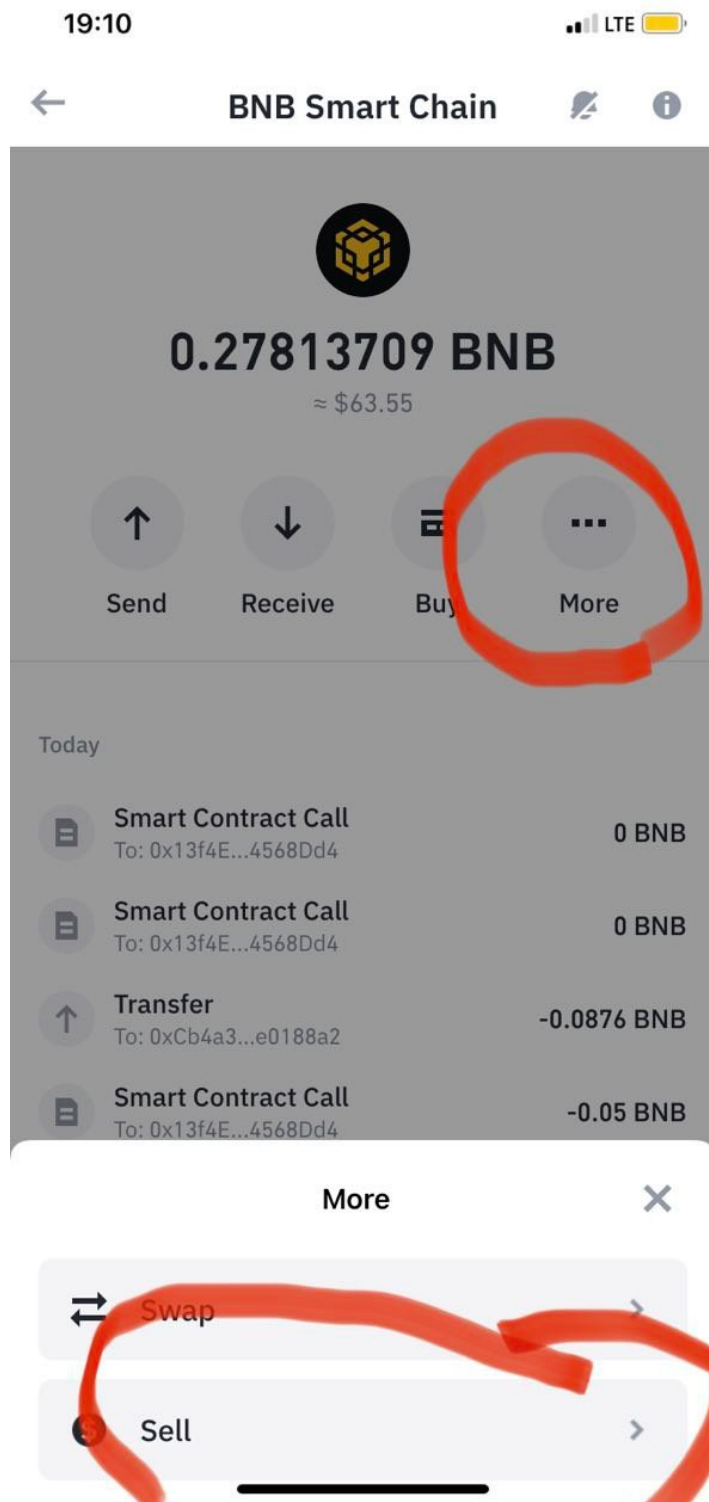

Once we have our BNB, we are ready.

Part 1: Cash Out To USD Directly From Trust Wallet
(or Metamask – see further down)

Find and select BNB from the Trust Wallet "Home" screen. (see lower-left for "Home")
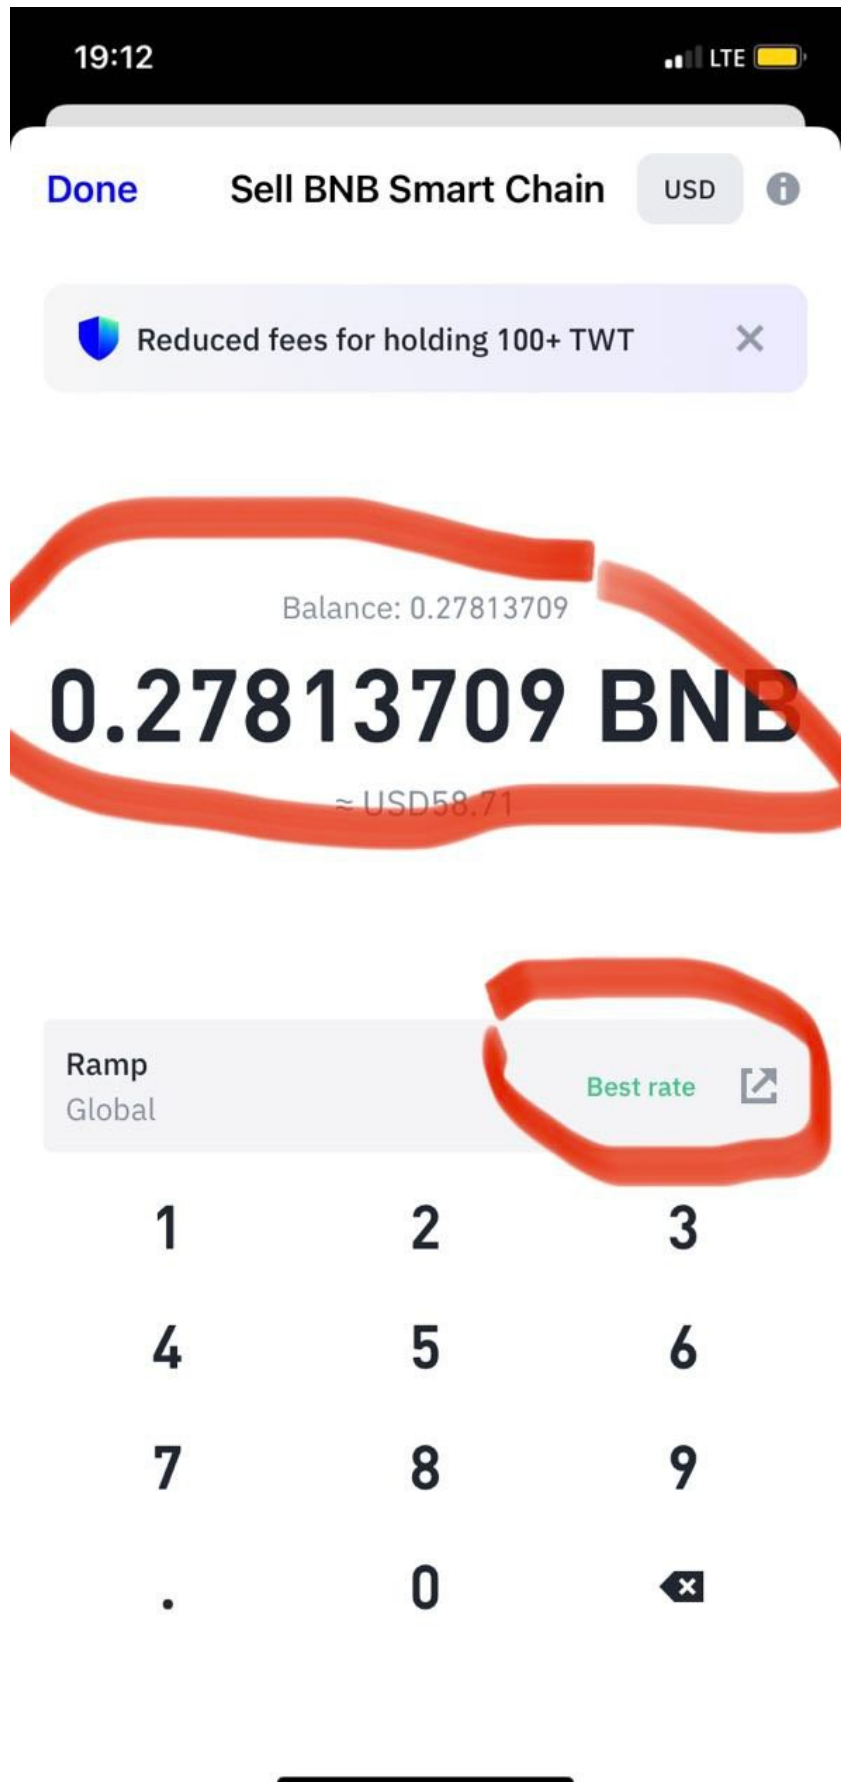

Next, click/touch "More"
(the 3 dots) and then select
"Sell".

Seems you have to manually enter the amount of BNB you wish to sell. Your balance is shown above that.

Then touch green "Best rate"

(Ramp Global)
(ramp.network)

For those with BNB on Metamask, please see this:

Here is the link:

https://ramp.network/blog/metamask-partnership

My experience with the next screens was not a good one.

It could be that I have an Iphone 11, or it could just be bad programming on the Ramp UI developers.

The "Proceed" button was not fully visible.

And it gets worse.

Anyway, touch the "Proceed" button.

This next screen is bad programming.

Where is the button to submit or to go to next steps once you have entered the bank information?

It's off the bottom of the page.

19:14   ■ LTE ▭

Step 1 of 3 ▬▬▬▬▬▬▬▬▬▬▬▬▬

Add a US bank account   💬

Which bank account should we send the funds to?

Routing number *

Add...   Paste

9 digits (ABA/ACH routing number)

Account number *

Add...   Paste

1 to 17 digits

Account holder *

Add...   Paste

Account type *

⦿ Checking   ○ Savings

The wait time to receive your transfer depends on
your bank. Processing times can take up to 2 hours
for banks that support RTP and up to 2 business
days for other banks. List of banks supporting RTP.

If you focus / touch inside one of the entry boxes, you will then sort of see the next "Proceed" button.

So that's it…. Enter your bank information and "Proceed" from there.
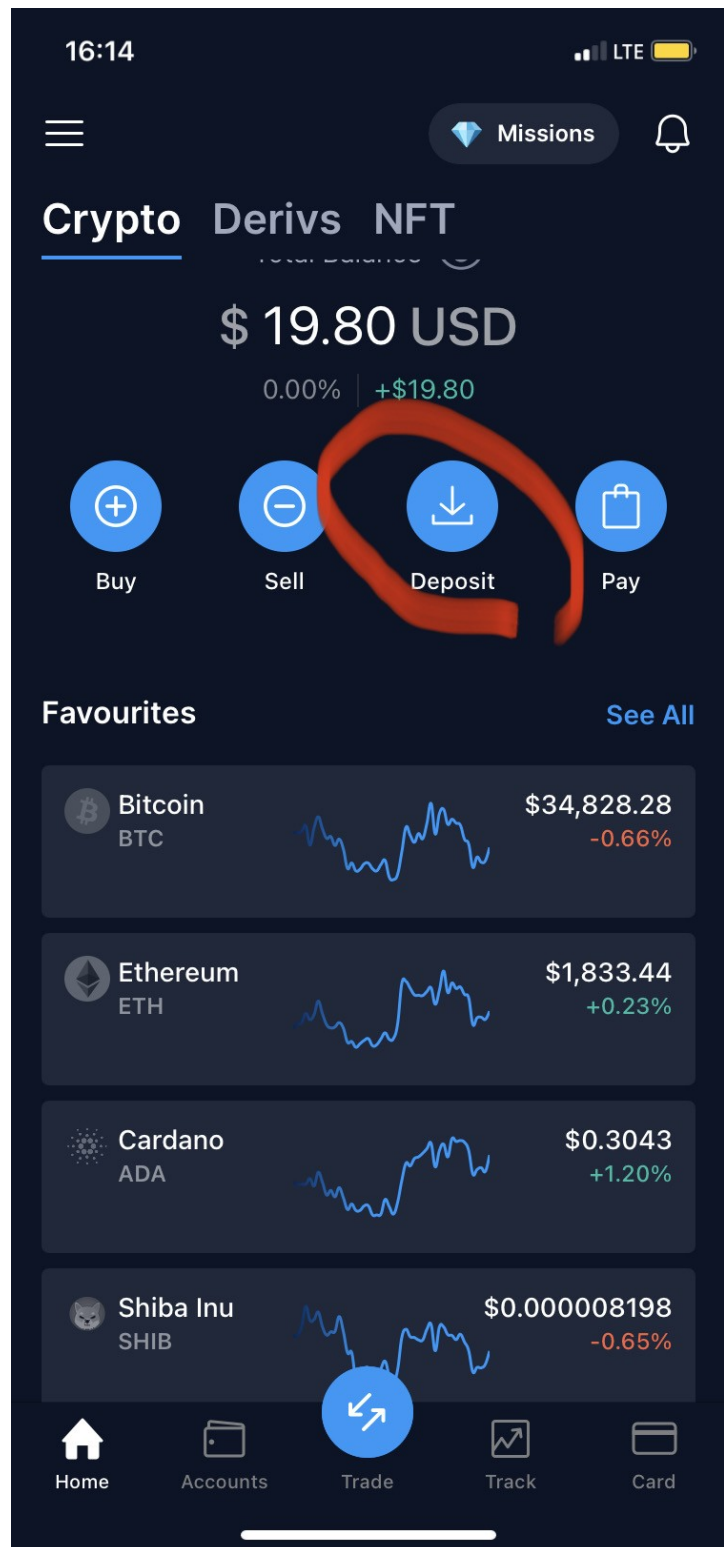

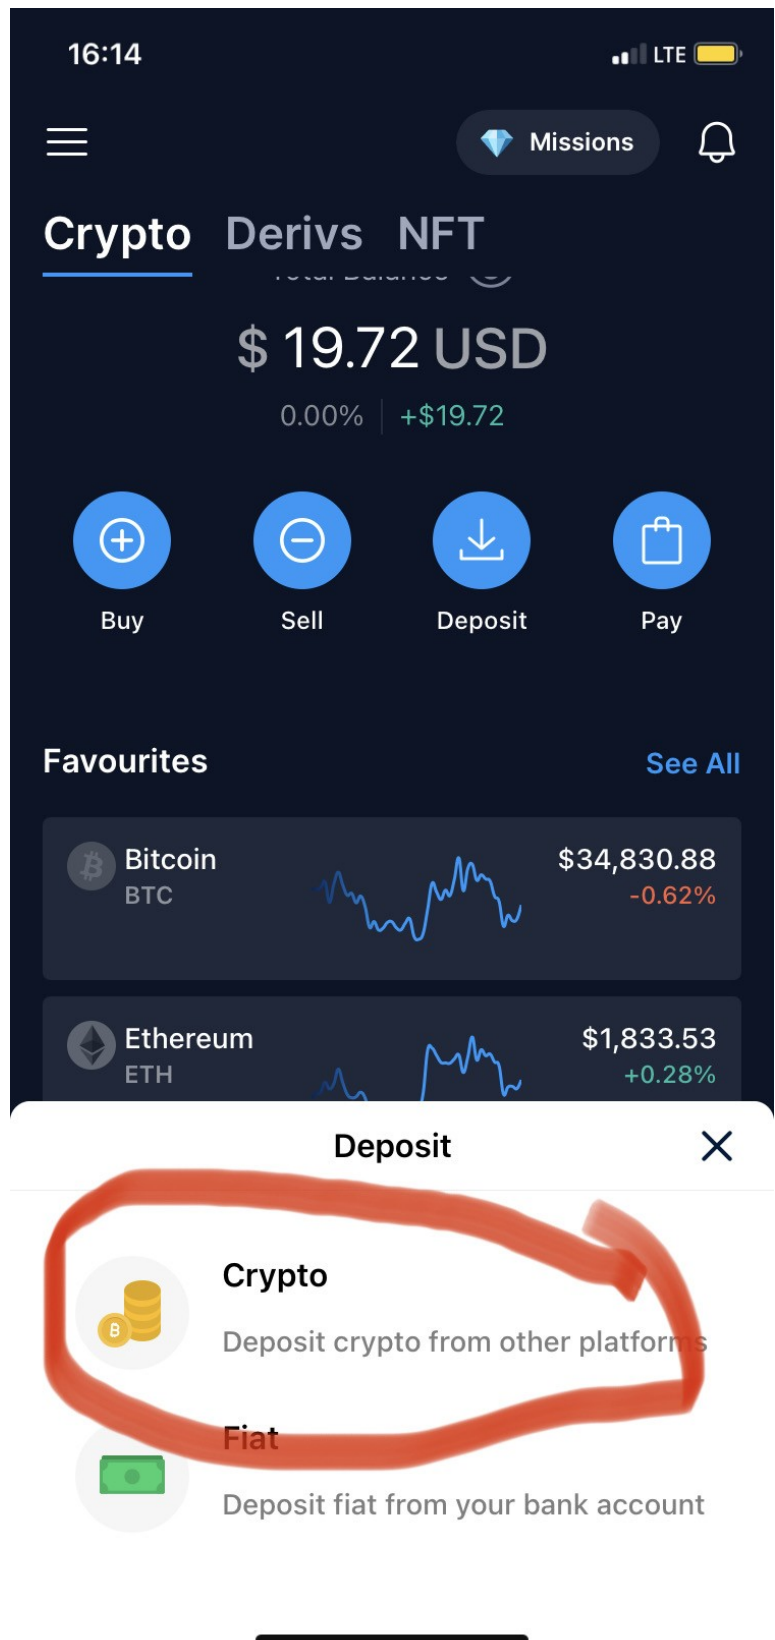

Part 2: Cashout to USD Via Crypto.com

Go to Crypto.com app on mobile device.
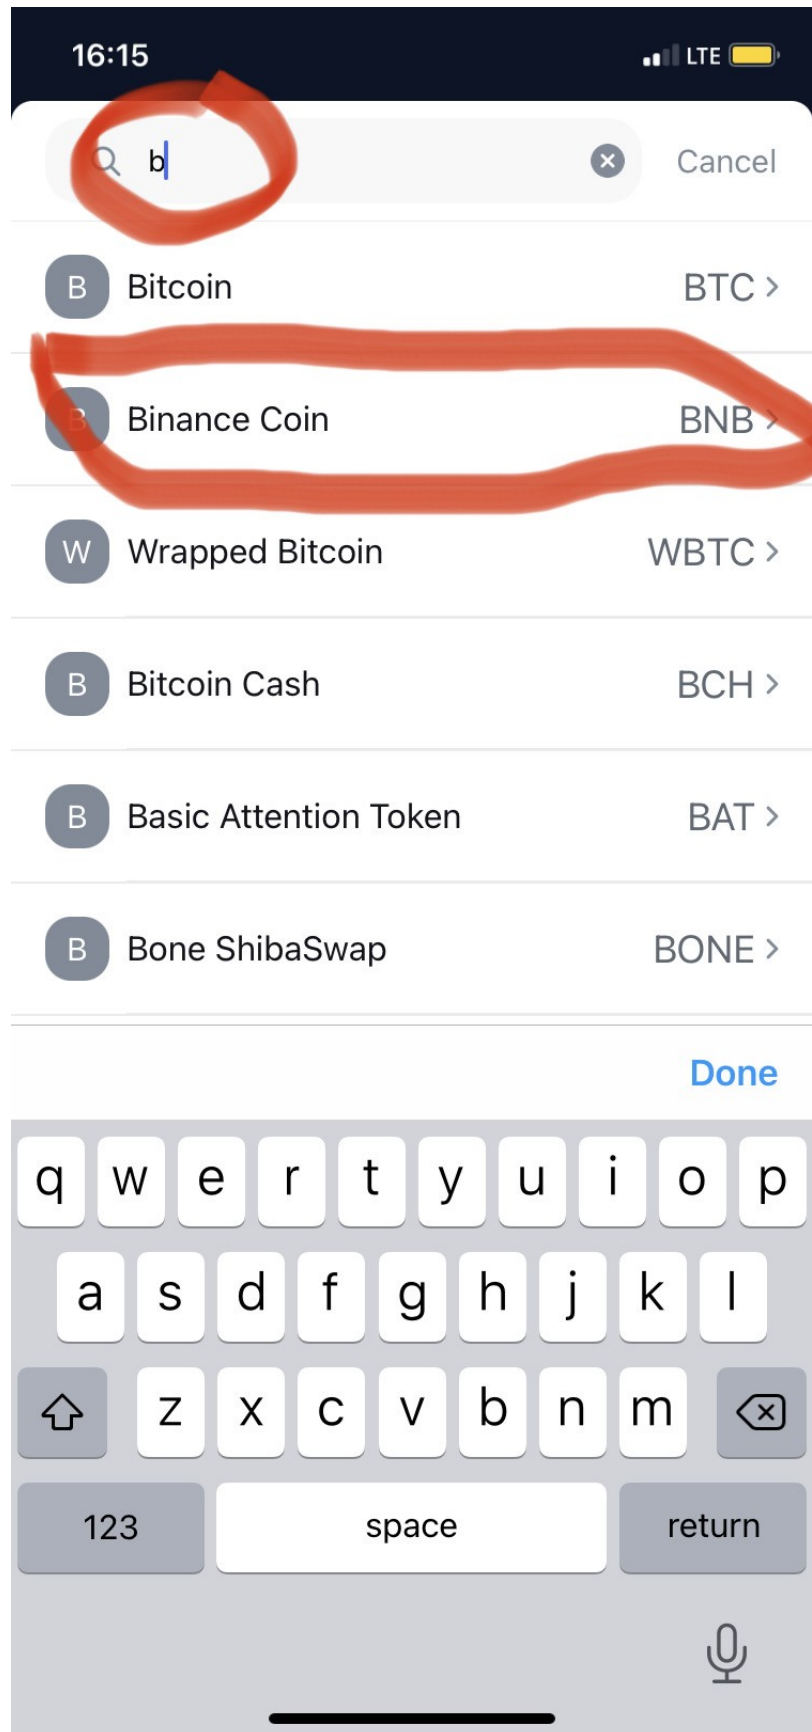

On the "Home" screen (see lower left), look for and touch the blue "Deposit" button.
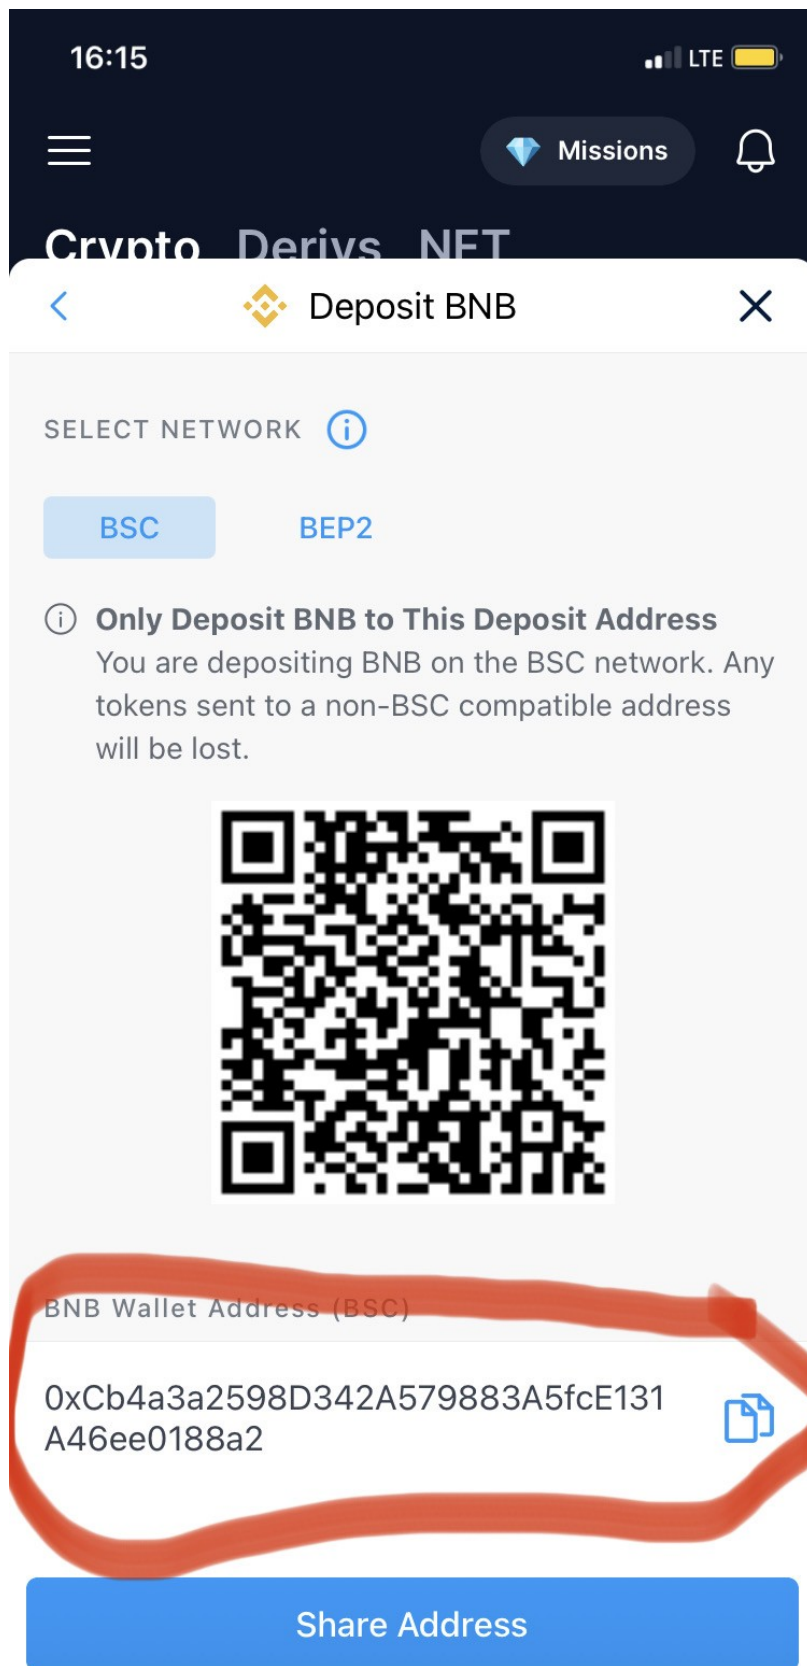

Then select to deposit "Crypto".

0.05 ⊗ BNB **Max**

≈ $11.39

Next

You probably have to confirm, etc.

Wait just a bit. Eventually, the BNB will show up at Crypto.com.

Go to Crypto.com app, at the "Home" screen again, this time select to "Sell", and then select "Binance Coin" (BNB).

This assumes that you have previously linked a bank or credit union, and this is outside the scope of this document.

From this point, follow the instructions to sell the BNB to USD and send it to your linked bank or credit union.
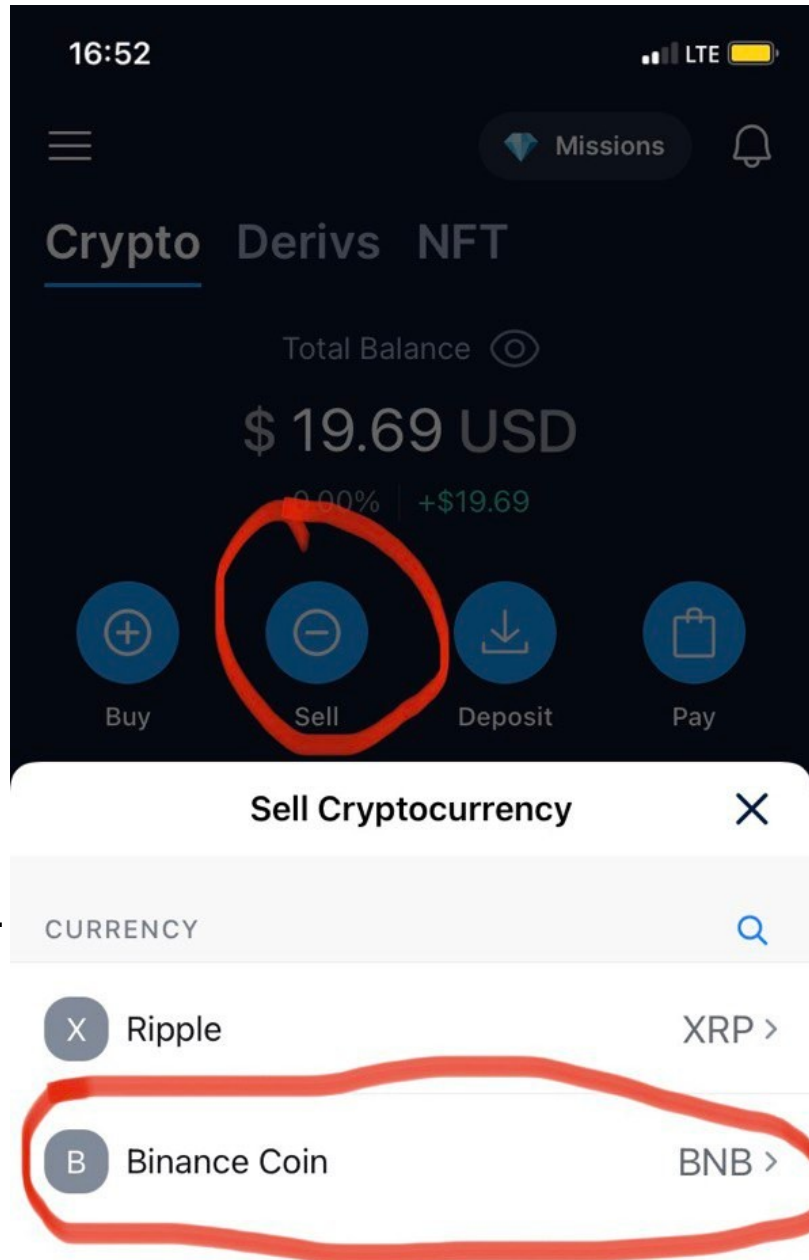

Part 3 - Buy some XRP with our BNB Tiger profits, Using MEXC

Why? Because you can send either BNB or USDT(BEP20) to MEXC. So because you can NOT buy XRP directly with BNB (there is a limited list of BNB pairs), it might be better, when you wish to take BNB Tiger profits, to swap for USDT(BEP20) for whatever you will be sending to MEXC.

The steps are all very similar

– you get the "Receive/Deposit" address (for USDT) from MEXC

-- you paste that address in Trust Wallet when you are ready to send USDT

-- that's it – once the USDT arrives at MEXC, you can buy XRP (or another coin)
